APPLICATIONS

• FRUIT CAGE • PHEASANT PENS • POND COVERS • ORCHARD PROTECTION •

Anti-hail Net

Fruit growers know only too well the problems which hail can cause with the possibility of entire crops being destroyed during an unexpected storm.

Tenax have successfully produced an Anti-hail Net which is lightweight yet strong enough to protect delicate fruit from storm damage. Requiring support from only posts and line wires, Anti-hail Net can be quickly erected and removed at the end of the season.

Manufactured from high-density polyethylene in widths up to 6m, Anti-hail Net is available in either black or white and is UV stabilised, rot-proof and chemical resistant.

Tenax Anti-hail Net
