

Protective Accessories

Accidents can happen wherever people work with machines. For this reason, STIHL has developed a comprehensive safety concept for the work with power tools. That concept includes not only the exemplary safety features of all STIHL machines, but also practical protective clothing and safety accessories. It is only when used in combination that these components ensure the best possible protection and optimum safety.

Powerful mid-range chainsaws - for private users and farmers

These STIHL chainsaws are powerful, but still light and handy. This makes them ideal for all sawing jobs in private gardens and on farms and particularly for felling firewood. The mid-range saws from STIHL feature all the same advantages as the COMPACT saws, except that their engine power is considerably higher

UAP Product Code	Displacement	Power (kW/HP)	Weight (kg)	Rec. bar length (cm)	Elec. Ignition system	Quick-stop chain brake	Auto. Chain lubrication	Elasto-start
SS 029	54.1	2.7/3.7	5.9	37,40	s	s	s	r
SS 039	64.1	3.2/4.4	5.9	37,40	s	s	s	r

s: standard r: retrofittable or special accessory

The powerful brushcutters - light, handy and versatile

The STIHL brushcutters never give up - not even on steep slopes overgrown with bushes and trees. Depending on the cutting tools and equipment fitted, they can be used for all purposes, from trimming lawn edges to thinning gnarled scrub.

UAP Product Code	Displacement (cm³)	Power (kW/HP)	Weight (kg)	Fuel tank capacity (l)	Elec. Ignition system
FS 80	25.4	0.9/1.2	5	0.44	x
FS 85	25.4	0.9/1.2	5.1	0.44	x
FS 120	30.8	1.3/1.8	6	0.64	x

The STIHL clearing saws - for efficient landscape and forest care

The STIHL clearing saws - from the light-weight STIHL FS 160 to the powerful thinning saw STIHL FS 420 - can be used for a multitude of professional purposes, from clearing tough undergrowth and coarse scrub along roads and on embankments to reducing the number of trees in young stands. Their high operational reliability and outstandingly easy operation allow these machines to be used cost-efficiently.

UAP Product Code	Displacement (cm³)	Power (kW/HP)	Weight (kg)	Fuel tank capacity (l)
FS 400	40.2	1.9/2.6	7.9	0.68
FS 450	44.3	2.1/2.9	7.9	0.68
FS 450 K	44.3	2.1/2.9	8	0.68

Professional Secateurs & Horticultural Saws

Felco Model 2 - Based on the original Felco design

A top quality secateur made from high carbon steel. Precision, hardened blade with a wire cutting notch. The cutting blade are easily replaceable for a lifetime of use. The anvil blade is all in one forged to the handle for greater leverage. A sap groove prevents the blade and the anvil sticking.

The bearing and bolt are tempered and ground to prevent the blade spreading guaranteeing a long maintenance free life. Rubber cushion stop prevent excessive shock to the hand when cutting and the handles are covered in the distinctive, red Felco covering. Springs are easily replaceable and are designed for constant tension, a safety catch keeps the blades closed when not in use and each secateur is supplied with a key to adjust the blade mechanism. Length 21.5 cm

UAP Product Code FEL 2

Felco Standard Model 4

An economy secateur made to exact standards of the Felco Model 2 but without the sap groove, cushion stop or self adjustment key. Blade adjustment is by the centre bolt and nut. Felco Alloy handles ensure comfortable use over long periods. Length 21 cm

UAP Product Code FEL 4

Felco Economy Model 5

Felco's Steel handled economy model is designed for wide scale commercial users who need tools to last without the sophistication of the professional models. Maintaining the key Felco design elements the economy model lacks the wire cutting notch and sap groove. The blades are still fully adjustable using the centre bolt and nut. A long lasting tool for harsh environments. Length 22.5 cm

UAP Product Code FEL 5

Felco Compact Model 6

A small, light, yet strong secateur for fine delicate pruning - ideal for flower arranging. Perfect for the smaller hand or as a second secateur for a busy gardener. Length 19.5 cm

UAP Product Code FEL 6

Felco Model 7 'Professional'

A large secateur with a rotating handle which allows for a more natural use of the fingers. The rotating handle requires 30% less effort to use and is ideal for professional gardeners who are using secateurs on a regular basis. Less effort to operate the blades means fewer sore hands and blisters and helps avoid muscle problems such as tenosynovitis. Length 21 cm

UAP Product Code FEL 7

Professional Secateurs & Horticultural Saws

Felco Classic Model 8 and Left Handed Model 9

The Felco Classic in both Right and Left hand models has exactly the same specifications as the Felco Professional Model 7. The only difference being the fixed handles of the Classic and the rotating handle of the Professional. Length 21 cm

Right Hand Model - UAP Product Code FEL 8

Left Hand Model - UAP Product Code FEL 9

Felco Model 10 'Professional' - Left Handed Version of the Felco Model 7

A large secateur with a rotating handle which allows for a more natural use of the fingers. The rotating handle requires 30% less effort to use and is ideal for professional gardeners who are using secateurs on a regular basis. Less effort to operate the blades means fewer sore hands and blisters and helps avoid muscle problems such as tenosynovitis. Length 21 cm

UAP Product Code FEL 10

ARS Fruit Snips

Designed for prolonged use the ARS fruit pruners are for use at harvest time when collecting fruit or when undertaking light pruning jobs. Length 19 cm

UAP Product Code ARSV 1

Felco Pruning Saw, with Sheath

For pruning & cutting all types of wood.

UAP Product Code FEL 62

Replacement blade

UAP Product Code FEL 62b

ARS Professional Horticultural Saws

Easily cutting through large branches the ARS Pro Saws are designed for the serious gardener and professional nurseryman and forester. All saws have replaceable blades.
